PROFESSIONAL EXPERIENCE

ENERGYCO, INC., Columbus, Ohio

1989-2005

Senior Analyst (2001-2005)

Partnered with clients to analyze, define, and document business requirements. Researched, developed, and managed technical solutions for new and existing software applications to meet business objectives while following EnergyCo development standards.

- Implemented production control procedures for distributed applications for company compliance with the Sarbanes-Oxley Act (SOX).
- Implemented Web content management software to allow user-driven content management, thereby enabling the reallocation of two-thirds of IT resources to higher priority projects.
- Trained and mentored clients in using Web content management software providing them the flexibility to update departmental information in a timely manner.
- Insured Tax Department compliance with the latest IRS regulations and tax tables by coordinating and installing vendor updates for income tax software, increasing department efficiencies by 40%.
- Installed Search Engine for Corporate Intranet providing employees easier and more timely access to pertinent information. Reduced overall assistance calls by 72%.
- Implemented redesign of corporate Internet site creating a more intuitive look for stakeholders.
- Freed up client resources by implementing a new Asset Accounting system to replace legacy system.
- Provided support for internal Asset Accounting clients ensuring corporate IT service level agreements were met.

PROFESSIONAL EXPERIENCE
CONTINUED

Analyst/Programmer (1996-2001)

Consulted with clients to help define business requirements. Analyzed requirements determining software needs. Resolved client problems with software applications. Coded and/or updated programs as required.

- Interfaced a newly implemented mainframe GL system to an existing legacy asset accounting system avoiding a costly, time-consuming rewrite and thereby saving company almost \$1 million.
- Provided support for internal Insurance Information System to clients ensuring corporate IT service level agreements were met.

Senior Programmer (1989-1996)

Worked with clients to define business requirements. Analyzed business requirements to determine software needs. Resolved client problems with software applications. Coded and/or updated programs as required.

- Ensured IRS compliance of a large corporate tax depreciation system by managing and maintaining in-house software package.
